

This resource demonstrates how a combination of modern techniques is used to ensure that horseracing is both fair and prevents abuse of the horses involved. Based on the work of the Horseracing Forensic Laboratory (HFL) located near Newmarket in the UK, the book comprises five sections of student material. First, an overview of the work of HFL is presented, followed by sections on immunoassay, metabolism and chromatography. Teachers notes are also included. Following the explanatory text are questions, which assist with understanding and also illustrate real-life applications of the chemical techniques encountered at school. Chemistry at the Races is designed mostly for ages 16+, but some material is also included for younger students. It is an invaluable resource for teachers, enabling them to demonstrate an up-to-date and interesting context for their work.

Geschichte der gleichmä?igen Konvergenz: Ursprunge und Entwicklungen des Begriffs in der Analysis des 19. Jahrhunderts (German Edition), Farewell to America, Look Inside Cars (Usborne Look Inside), An introduction to developmental biology, SPACE Science Fiction: August, Aug. 1957, Hemoglobins, Part C: Biophysical Methods, Volume 232 (Methods in Enzymology), Inorganic Chemistry: Thermodynamics and the Reactions of Metals Unit 1: Concepts and Case Studies (Course S247), The frog; its reproduction and development,

The race for rutherfordium : Nature Chemistry : Nature Research Discover the role of chemistry in sport in this collection of educational Discover the chemistry behind one of the toughest athletic events - the 400m race. **Chemistry at the Races (RSC Publishing)** Open Access · Historical Collection.
