

The authors offer a unique exploration of the formative effects of childrens early life experiences, with an emphasis on interactions among neurodevelopmental, behavioural and cultural dynamics. Multidisciplinary case studies focus on specific periods of development, or windows of susceptibility, during which care giving and other cultural practices potentially have a long-lasting impact on brain and behaviour. Chapters describe in detail: how social experience interacts with neurodevelopmental disorders; how epigenetic mechanisms mediate the effects of early environment; the interaction of temperament and environmental influences; the implications of early life stress or trauma for mental health and well-being; and the cultural shaping of sexual development and gender identity. The final section translates insights from this work into a fresh appraisal of child-rearing practices, clinical interventions and global public health policy that affect the mental health and well-being of children around the world.

The insect world of J. Henri Fabre in the translation of Alexander Teixeira de Mattos, Chinese medicine clinical skills training series of textbooks: Clinical Skills in Pharmacy Practice (with CD-ROM 1) (Paperback)(Chinese Edition), The Spiritual Combat: and a Treatise on Peace of Soul (Tan Classics), Alpine Plant Life: Functional Plant Ecology of High Mountain Ecosystems, Modern Topics in Biochemistry, Posttraumatic and Acute Stress Disorders, Something Abundant, Discipline and Recovery: 100 Meditations for Persons in Recovery, CliffsNotes Anatomy and Physiology Quick Review (Cliffsnotes Quick Review) 2nd (second) edition, ?Que hablo con mis hijos sobre drogas? / What do I talk to my kids about drugs? (Dialogar Para Prevenir) (Spanish Edition),
