

This title is intended as an aid to those involved in monitoring nests for research and conservation purposes. Written and illustrated by experts, this richly illustrated guide contains a wealth of information for 146 British and Irish species, together with introductory sections on nest-monitoring techniques, nest identification, legislation, the BTO Nest Record Scheme and nest-finding skills. Its combination of concise notes and quick-reference facts and figures, together with expert advice and chapters on the basics, makes it an ideal field companion for both beginners and experienced nest recorders. Each species account covers: where the species breeds, with a UK distribution map and details on typical habitat and nest sites; seasonality of breeding, with a timetable of when most birds are on eggs and chicks; identification of eggs and young, with photographs; and, species-specific nest finding methods and considerations.

Wildflowers of the Northern Great Plains, Third Edition, Clima (Real Readers En Espaol) (Spanish Edition), Oeuvres completes: Volume 4: Series 2 (Cambridge Library Collection - Mathematics) (French Edition), The Honey-Bee: Its Nature, Homes and Products [1884], Konflikte und Gewalt in der Schule: Zusammenhänge zwischen dem wahrgenommenen schulischen Sozialklima und den Einstellungen sowie dem Umgang Jugendlicher mit Gewalt -Eine Studie- (German Edition), Manuale PCR (Italian Edition), Behavioural and Mental Health Research: A Handbook of Skills and Methods, Introduction to Heterogeneous Catalysis (Advanced Textbooks in Chemistry), New York City of Trees,
